

FOR IMMEDIATE RELEASE

Tensor Supplies H-50 Folder to Polaris Trykk

WOODRIDGE, MAY 5th 2016 - Tensor International supplies an H-50 folder to Polaris Trykk at their Harstad Norway facility. The fully shaftless H-50 folder was installed on Polaris ten tower one folder Goss Universal pressline. The H50 folder has recently undergone a major redesign/upgrade, adding additional features and automation including;

- Independent drives on the Lower Folder Section, RTF, Nipping Rollers, Quarter folder, Transport tapes and delivery.
- Simplified gearbox design
- Pneumatic controlled nipping rollers
- Touchscreen on folder for folder settings, product configuration and information
- Electronically controlled trolley and nip pressure from control desk and touchscreen
- Integrated Tolerans compact stitcher

“We have taken on a lot more production lately due to a closure of a nearby print shop. We needed a second output to meet this volume increase but also reliable backup folder. The Tensor H50 folder is well-known to us from two of our other printing sites in Norway. It was important to do business with a stable and long term partner and with the automation level offered on the upgraded H50, the choice became obvious to us”, says Steinar Bakken, CEO, Polaris Trykk AS.

The upgraded H50 design is a collaboration between Tensor’s engineering department and its sister company DCOS, providing the automation. The folder shipped with a fully independent drive and control system and was integrated via an interface to the existing EAE press control system.

The folder was produced and shipped in record time, 13 weeks. Then transported by air to Europe in order to be installed during Easter holidays with a window of few days without production. The folder is now in daily production.

Tensor press offering information can be found at www.ustensor.com.

About AH Tensor International LLC

Tensor International was created in early 2012 by combining the synergy and design innovation knowledge of key former employees of Tensor Group with DCOS, a premier innovator and major printing industry automation supplier. This combination of strengths makes Tensor International unique in the single-wide, single-round press market and allows the company to offer press packages that provide outstanding ROI and reliability throughout the expected life cycle of the press.

Tensor's semi-commercial, insert and newspaper press equipment is valued worldwide for incomparable durability, quality and user-friendliness. Tensor manufactures its single-width press equipment and related parts exclusively in the United States and retains a worldwide network of dealers to support its sales, service and marketing efforts.
