NEWSDAY TO INSTALL SCS/TRACK TO MODERNIZE DIGITAL AND PRINT AD PRODUCTION FOR
OVER 150 LOCAL AND REMOTE USERS

Newsday Media Group, the leading news source for Long Island and New York City and the ninth largest newspaper in the United States, has selected SCS to install SCS/Track for print and digital ad production.

Based in Melville and reaching over a million households and businesses in Nassau and Suffolk counties, Newsday Media Group is a longtime SCS customer. SCS/Track will be their fourth SCS system, joining Layout-8000, SCS/ClassPag, and Fotoware.

SCS/Track replaces two different legacy systems that Newsday had been using since 1995. 150 employees will be transitioning to SCS/Track. Gregory McDonald, Ad Systems Supervising Analyst at Newsday, says that "The biggest gain for us will be going to an all-digital workflow."

For both print and digital ads, Newsday intends to use SCS/Track's remote ad delivery capabilities as well as proofing and markup provided by Newsday's sales staff.

"SCS/Track will combine functionality achieved by disparate systems for all of Newsday Media Group, which includes Newsday's main daily product as well as the Hometown Shopper weeklies and What's Happening on Long Island," according to Phil Curtolo, Director of Sales at SCS. "SCS/Track is quickly becoming the standard for print and digital ad production automation."

SCS offers an extensive line of publishing related applications, including Layout-8000™. More than 300 sites producing over 1,000 publications in 18 countries in five languages use SCS mission-critical software every day. SCS is privately held by Richard and Martha Cichelli.
